Job Application for Azenix

Dear Hiring Manager

About Me

I currently work as a web developer for a Shopify growth agency called M3 Digital on a temporary contract and am looking for a more permanent position. I'm a computer science student at QUT and am in my final semester (July 2022). I'm very passionate about all aspects of software development and have been working on a portfolio of projects which can be viewed at www.benrogers.dev. I am skilled in front end technologies such as HTML, CSS, SCSS, JavaScript, React.js, and CSS frameworks such as Bootstrap. I also have strong skills in back end technologies such as SQL, Node.js, Express.js, Python, C#, Java, and REST API's. Additionally, I am familiar with test driven development, database design and software design patterns. I have worked on many projects involving multiple developers so I am proficient with Git version control, issue tracking and Agile methodologies. I am a hard working and high achieving student with a GPA of 6.15/7.

Why Azenix?

If given the opportunity, I would love to work at Azenix. I am open to working in different technology roles. I am very passionate about software development and cloud computing. I think the work that Azenix looks really interesting and think that it would be great workplace. I would be very dedicated to making sure I improve and grow within the company.

Why Me?

I'm very confident that I will be an asset to your company. I love tinkering with technologies and learning new things. I am a fast learner and can pick up new tech stacks quickly on the job. I have been working as a web developer professionally for over 4 months and am comfortable working under pressure and meeting deadlines. I have a high GPA and very high marks in my programming units at university. In my software development units over the past year, I have achieved straight 7's (above 85%), and above 95% in all my web development units.

Thank you for your time and consideration. I look forward to speaking to you about this opportunity.

Sincerely,

Benjamin Rogers
